

GLOW WIB
Occupational Demand List Policy
Amendment 5/18/04

Background:

The previous GLOW Demand List was very extensive including hundreds of demand occupations in a variety of areas. The GLOW WIB identified 5 Industry Clusters in demand determined through surveying regional businesses. The State Labor Department recognizes these 5 demand industry clusters in GLOW and has encouraged us to train in these areas by providing specific funds to do so. .

Policy:

The GLOW WIB Occupational Demand List is comprised of the five demand industry clusters in GLOW as identified through the skill gap surveys conducted by the WIB. The GLOW demand industry clusters are Manufacturing, Healthcare, Agriculture, Commercial, Technology.

Training needs identified and documented in any of these clusters may be funded according to current policies. For training requests outside these clusters, the need must be identified, document, and sent to the Program Evaluation/Oversight Committee with a request for a one-time exception.

POLICY #22

APPROVED 5/18/04
